

FITCE.be – The Belgian forum for the ICT & Media professionals' community.  
Newsletter – February 2009

Dear FITCE.be supporter,

A new year, a new way of communicating within our community.

Last year we have refreshed the look and feel of our website turning it into an on-line communication forum delivering information, presentations and background about the FITCE.be events as well of events within our member's community.

As of this newsletter we bring the communications format to a more convenient level to you to facilitate an easy reading.

Even more in the present global economic gloom, people keep feeling the need to exchange ideas and insights within their professional network.

FITCE.be will further work to be your partner for this ideas exchanging platform.

It's within FITCE.be's main objective to further promote this networking platform to foster dialogue and interaction between its ICT and Media' professionals community : a ideal remedy to soothe the tough economic times.

This objective is also reflected in our 2009 events programme as you will detect in this newsletter.

Have all a great 2009 and let's make the best of all the talents available within our community!

The FITCE.be Board.
